Re: Red Resort's proposed Golf Course Development in the Topping Creek Watershed.

The directors of the Friends of the Rosland, the non-profit community organization with a long history of advocating for balanced land-use planning in the Rosland Range, have particular concerns regarding Red Resort's proposed Golf Course Development.

We are concerned that any such development in the Community's watershed could diminish the quality and quantity of Rosland's water supply.

Additionally, we are concerned about the potential negative impacts of such a development on the ecology of the affected and surrounding area.

A thorough, independent and open process of reviewing the forthcoming development proposal will enable the community to be satisfied that these concerns are addressed appropriately.

Thank you for your consideration,

The Directors of the Friends of the Rosland Range
