

### Early Winter Edition

### GREETINGS FROM THE SUMMIT, HOPING EVERYONE IS SAFE AND HEALTHY

- The Rec Site has been very busy early this year. Users are enjoying the great snow and sunny skies.
- All cabins are open as the COVID restrictions have been lifted.
- The AGM was held Nov 23. Please see the minutes as posted on the website.
- The Crowe's Nest Cabin was constructed by Les Carter and crew this summer replacing the old cabin. This is the 10th cabin in the Rec Site. Located in the sub alpine, it makes for a more challenging ski for users. Be prepared. Well done Les and crew.
- All cabin woodsheds have been stocked for the winter. Please use only what you need to get the cabin warm. Please no outdoor fires as they consume too much wood.
- A new colourful informative map has been installed at the main Kiosk at the Summit - check it out.
- The bridge over the Booty Creek has been widened for a safer crossing.
- Please help with the cost of plowing by FORRS of the 5 parking areas. We (FoRRS) pay for this plowing. YRB is focused on the highway itself and can help us only when time permits and cannot plow some lots. Donate at the Kiosk at the Summit. Online donations ([www.RosslandRange.org](http://www.RosslandRange.org)) will receive charitable tax receipts. Much appreciated.
- A gentle reminder, if your dog does its "business" on the trails please ensure that you remove it. Doggie klister doesn't provide much glide and really sticks to snowshoes - thanks.

*Enjoy the Rec Site and all it  
has to offer.*
